DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 17-27 & 32-36, drawn to camera, system and detail and camera image stabilization, classified in class 348, subclasses 207.99 & 208.99.
- II. Claims 14-16 & 28-31, drawn to specified accessory for camera support, classified in class 348, subclass 375.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a quick release plate and a signal port connected to a support sensor configured to non-permanently electrically connect to a device signal port which are not required by the invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2615
